Company Profile

For over 75 years Edler & Company Warehousing has provided 3rd party logistics solutions to local, national and international companies needing warehousing, fulfillment, transportation and other distribution services. Since its inception as Atlas Van Lines, Edler has grown to become one of Chicago area's largest and most respected supplier of 3rd party logistics and is committed to providing superior supply chain solutions for today's global marketplace. Offering over 800,000 square feet of warehouse facilities and utilizing a state-of-the-art RF Warehouse Management system, Edler can provide the proper warehousing, inventory management and distribution services required by today's global organizations. Whether "business-to-business", "business-to-consumer" or "wholesale-to-retail", Edler is committed to providing superior, individualized service that exceeds customer expectations.

Business Situation

Faced with increased competition and demands from existing customers for more robust through put within the supply channel, Edler needed to update its business model to include a WMS in order to better serve existing customers and attract new ones

Solution

In 2003, Edler selected the Savant WMS to fulfill their warehouse automation needs. Savant has successfully enabled Edler to add new customers by providing a high quality of service.

"Savant was the most comprehensive solution for our needs all at a competitive price...I [we] looked at EXE, Red Prairie, and Savant Software. The benefits of implementing Savant WMS started with the ease in how we can now process orders. Savant has allowed us to streamline the entire fulfillment process. Customers are more apt to go with Edler Warehousing now that we can boast a state of the art, real time, warehouse management system. Our enhanced reporting capabilities in Savant give us greater access to our data. The implementation was done within budget. Edler Warehousing has not had to turn a customer away because we now have a robust and flexible warehousing management solution in house." Mark Chevalier, Manager of IT
